

Delta-Cast® Conformable Cast Tape Casting Impression

Vendor:

BSN Medical Inc.

Features & Benefits:

- Constructed polyester substrate with extensible yarns impregnated with a water activated patented low tack resin
- Provides rigid and semi-rigid casting option for primary and secondary casting
- Conformability around curvatures is achieved through a flexible knit that allows for stretch on the bias (corner to corner stretch)
- Can take shape of underlying object without tape puckering, no need to make special tucks or folds for smooth appearance
- Simple activation
- Soft edges/smooth finish
- Enhanced Radiolucency—does not prohibit the viewing of the fracture site during X-rays
- Easy to unroll
- Strong & Lightweight
- Latex free
- Fiberglass free

Specifications:

- Setting time: Use clean water (25°C / 77°F). Cooler water will lengthen the set time whereas warm water will decrease the set time
- Use: Immerse bandage in water and squeeze lightly up to 3 times. More squeezes will result in a faster set time
- Set time is approximately 3–5 minutes
- In weight-bearing areas, suggestion of 4 to 5 layers of cast tape to be applied in a spiral motion using uniform light tension. Final turn should be applied without tension and smoothed in place
- Cast is weight-bearing in 20–30 minutes
- Store in cool dry conditions (below 20°C / 68°F)

Indications:

- External circumferential immobilisation of fractures
- Emergency trauma splinting

Contraindications:

- Do not use where there is a risk of swelling

Call Points:

- Emergency department
- Fracture clinic
- Orthotist
- Occupational Therapist

Warranty:

- Against manufacturer defects
