

Model 1900 - Monodos® Joint Orthotic Joint

Supplier:

Becker Orthopedic Appliance Co.

Features & Benefits:

- Safe and easy mechanism to control spasticity and joint contracture
- Cost effective alternative to serial casting
- Available in 3 sizes: *A**, *B* and *C*
 - *A* Size*: Recommended for knee joint applications
 - *B Size*: Recommended to be used on large children, adults and cases where patient exhibits spasticity
 - *C Size*: Recommended for children and small adults, not for patients with spasticity
- Used in variety of applications including knee (*A Size*), ankle, wrist, elbow
- Single joint may be used for right or left sides
- Joint allows free motion in one direction, but blocks all rotation in the opposite direction until released
- A free-motion joint is recommended on contralateral side (Oklahoma recommended) — for *B* and *C Size*

Specifications:
