

» Model C-14 Pacific™ Adjustable Collar (PAC)

Cervical Collar

Supplier:

Becker Orthopedic Appliance Co.

Features & Benefits:

- Two-piece construction with laminated, bi-lateral adjustable hook and loop closure
- Height on collar can be adjusted (at predetermined ranges) by turning two screws located on anterior shell surface
- Injection molded to ensure product consistency
- Raised sizing scale on anterior distal portion of plastic shell
- Large trachea opening for quick access emergency tracheotomies
- Mandibular contour allows stability and comfort
- Consists of three thick open cell foam liners (proximal anterior, distal anterior, posterior) attached to plastic shell for easy cleaning
- MRI, CT and X-Ray compatible
- Latex free

Specifications:

- Materials: *Shell= 3/32" low density polyethylene*
