

**Inline Air Walker**  
**Pneumatic Walker**

**Supplier:**

DeRoyal Industries Inc.

**Features & Benefits:**

- Malleable offset uprights (side channels) used to position and hold the straps and liner in place for a proper fit
- Side channels accommodate for swelling
- Wide foot bed for comfort and stability
- The low profile rocker sole assists patients through natural gait and reduces plantar pressure
- Breathable removable inner liner wrap
- Air valve located in front pocket at proximal end of walker for easy access and use. Included pump may be stored in the front pocket
- Integrated dual air bladder located medially/laterally. Use included pump to inflate/deflate equally for even pressure distribution
- Set of four compression pads included to offload the malleoli and force fluids out of the achilles area
- Latex free

**Specifications:**

- Available in three sizes (see table)
- Available in High Profile or Low Profile versions
- Five straps for High Profile version, three straps for Low Profile version
- Color: black

**Indications:**

- Stable fractures of the tibia, fibula, talus and tarsus
- Acute ankle sprains Grade II & III
- Syndesmosis sprains
- Soft tissue reconstruction
- Postoperative immobilization
- Metatarsal fractures

**Call Points:**

- Physician
- Orthotist
- Casting technician

**Warranty:**

- Against manufacturer defects
