

E-Z Arm Abduction Orthosis

Arm Abduction Orthosis

Vendor:

Fillauer LLC

Features & Benefits:

- All-metal frame (aluminum and stainless-steel) is vinyl coated for comfort and skin protection
- “Worm gear” adjusts arm abduction angle from 20–110° without the need to loosen or remove any parts
- Waistband, forearm and humeral cuffs affixed onto a slotted bar can be quickly positioned and locked by tightening set screws
- Horizontal rotation of shoulder and elbow joints can be set for free motion or locked in any position
- Malleable thoracic band can be adjusted to patient’s body contour
- Foam padding increases comfort
- Chest and shoulder straps latch with quick-release buckles
- Universal side: reversible to fit both right or left arm (orthosis is pre-assembled for the right arm)
- Second snap-on shoulder strap available to order for additional support

Specifications:

- Frame composed of vinyl coated aluminum and stainless-steel
- Color: black
- Fits patients: 5 foot and over

Indications:

- Injuries to shoulder/arm
- Shoulder subluxation
- Rotator cuff rupture
- Postoperative conditions to the shoulder arm region that requires abduction positioning

Call Points:

- Physician
- Orthotist
- Physiotherapist

Warranty:

- Against manufacturer defects—single patient use only
