

California™ Hip Orthosis

Vendor:
Orthomerica®

Applications:
• Hip dislocation Orthosis

Patient Benefits:
• Comfortable
• Convenient, can be worn under clothing

Practitioner Benefits:
• Universal components reduce inventory

Features:
• Patented compound closure system
• Abduction wedge regulates clearance of hip joint
• One-pull compression tab with velcro® hook
• Hip joint provides flexion/extension stop
• Lightweight, universal thigh component
• Low profile

Specifications:
• Four adjustable sizes (small to X-large)

Indications:
• Post-op revision patients who have undergone a surgical procedure and need an orthosis
• Adult patients with CVA, spinal cord injuries or head trauma
• Patients who have been non-compliant with plastic hip orthosis
• Patients who's cognitive functions impair their ability to follow hip precautions
• Patients with weak hip abductors who need a kinesthetic cue and positioning to prevent dislocation
• Elderly patients confined to bed who are at risk for dislocation

Contraindications:
• Severely unstable hips that need significant control of adduction may need a more restrictive orthosis
• Patients with 2 or more dislocations may benefit more from a rigid plastic orthosis
• Hip replacement patients with poor alignment of the pelvis/acetabulum
• Patients requiring a KAFO attachment may need a more rigid pelvic band to enhance control of internal/external rotation and adduction/abduction

Call Points:
• Orthotist

Warranty:
• Against manufacturers defects
