

**California™ Mid-Profile Orthosis  
Spinal Orthosis**

**Vendor:**  
Orthomerica®

**Applications:**  
• Stability and circumferential compression

**Patient Benefits:**  
• Comfortable  
• Stable  
• Durable

**Practitioner Benefits:**  
• Patient compliance

**Features:**  
• Patented one-pull compound closure system provides patient-regulated compression to supplement abdominal musculature  
• Coolfoam™ liner provides comfortable patient interface  
• Thermoplastic posterior component extends to T9 and provides total contact over the paraspinal muscles  
• Component can be removed during rehab so the patient can strengthen abdominal and back muscles with a safe ROM

**Specifications:**  
• Measurements to be taken at waist circumference

**Indications:**  
• Postoperative laproscopic disk replacement  
• Postoperative IDET procedures  
• Postoperative lumbar laminectomy spinal fusion  
• Chronic low back pain  
• Mechanical back pain with activities of daily living  
• When spinal control of extension and flexion is desired or required

**Call Points:**  
• Physiatrist  
• Orthopedic surgeon  
• Orthotist  
• Neurosurgeon  
• Physical therapist

**Warranty:**  
• Against manufacturer defects
