

» Iceross® Dermo®

Liner

Supplier:

Ossur Americas

Features & Benefits:

- Cushioning and comfort for low to moderate active patients
- Iceross® Wave feature allows easier flexion at the knee. It is designed so that the material stretches effectively at the front and folds in a controlled way behind the knee
- Vaso-constriction is reduced and blood-circulation is promoted at point of knee flexion
- Patented stabilizing matrix prevents distal elongation
- A blend of Aloe Vera, Vaseline® and menthol helps to maintain healthy, strong skin
- A combination of DermoGel® silicone and elastic Supplex® outer cover offers excellent durability
- Soft silicone relieves pressure and discomfort due to bony prominences and/or sensitive areas and scarred skin tissues

Specifications:

- Type: *Cushion and Locking Liner, with or without Wave feature**
(*Available for Standard Locking Liner, 3mm thickness only)
- Style: *Standard, Uniform and Conical*
- Material: *DermoGel® silicone with Active Skin Care*
- Thickness: *3mm, 6mm* and 9mm***
(* Available for Standard and Uniform styles only)
(** Available for Uniform style only)
- Matrix length: *10cm*
- Sizes: *See chart*

Indications:

- Transtibial applications
- Users who need/prefer more freedom of movement (Wave option only)
- Diabetic users and those with compromised vascular conditions

Call Points:

- Prosthetist
- Prosthetic technician
