

» Thermo Formable Fabric

Padding

Supplier:

Proteor

Features & Benefits:

- Thermoformable padding that can be used like Plastazote®
- Heat moldable at 170°C (338°F)
- Comfortable and soft to the touch
- Used without glue, the material complies with sustainable development policies and limits possible allergic reactions

Specifications:

- Materials: 40% Polyester
54% Polyethylene
- Heating temperature: 170°C (340°F)
- Heating time: 30 seconds – 1 minute
- Molding time: 30 Seconds
- Cooling time: 1 minute
- Thickness: 6mm (1/4")
- Colors: Black, Blue and Pink
- Width: 1,450mm (57")
- Length: 1,000mm (39 3/8")

Indications:

- Padding for orthotic devices

Call Points:

- Orthotist
- Orthotic technician

Warranty:

- Against manufacturers defects
