

Select Myo Electric Hand

Myoelectric Hand

Supplier:

RSLSteeper Group Limited

Features & Benefits:

- High strength, rigidity and durability provided by rugged aluminum chassis and design of structural elements
- Inner glove covered chassis for protection against moisture, thereby preventing corrosion
- Powerful mechanism giving a grip force output suitable for most routine daily tasks
- Innovative, built-in electronics provide a choice of nine control modes for the hand through a dial switch feature
- Nine switch selectable control modes, including five one-muscle and four antagonist-muscle options
- On-board system includes an electronic “gear change” allowing power to be stored and released on demand
- Extra rigid fingers
- Different wrist options to accommodate your patient’s needs
- In-hand on-off switch
- Safety thumb release mechanism
- Developed to be used as a stand-alone system or to be integrated with existing systems from other manufacturers

Specifications:

- High strength aluminum construction
- Three wrist options: Quick Disconnect Wrist, Friction Wrist and North American Thread
- Available in four sizes: 6¾ for a Child (approx. 8–12), 7¼ for Adolescent/Adult and 7¾, 8¼ for Adult

Indications:

- Upper extremity amputation in adults and children

Call Points:

- Prosthetist
- Prosthetic technician

Warranty:

- Against manufacturers defects

2308
