

» Alpha® Hybrid Liner (Select Fabric)

Transtibial Liner

Supplier:

WillowWood™

Features & Benefits:

- Hybrid gel is a firmer durometer formulation of TPE with a Kevlar® additive
- Gel provides greater durability for the moderate to high activity patients and users with fleshy limbs
- Two gel styles available — progressive style and uniform style (to retrofit existing socket)
- Locking progressive gel style has an accordion (ridge profile) umbrella designed to flex and conform to anatomical shapes
- One way circumferential fabric stretch provides tissue compression for ease of donning. It does not stretch lengthwise to limit pistoning.

Specifications:

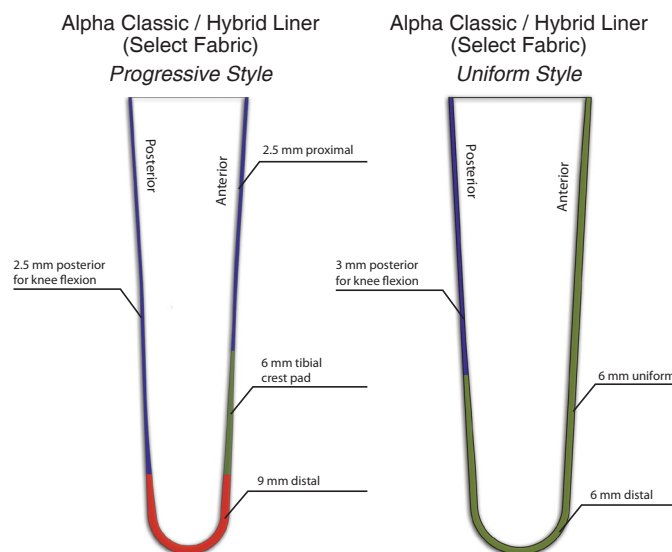

- **Types:** *Cushion and Locking*
- **Styles:** *Progressive and Uniform*
- **Thickness:** *Progressive= 2.5mm proximal and posterior sides
6mm tibial crest
9mm distal cushion*
*Uniform= 6mm anterior and distal sides
3mm posterior side*
- **Sizes:** *Small, Medium, Medium Plus, Large, Large Plus and X-Large*
- **Color:** *Gray / Light Gray*
- Progressive style should be used for new sockets only
- Small locking liners with progressive style comes with a standard umbrella
- Uniform locking liners have standard umbrella to fit into an existing socket
- Place logo on anterior side for proper fit

Indications:

- Moderate to highly active transtibial amputees
- Amputees with fleshy tissue that require stabilization of soft tissue

Warranty:

- 12 months, against manufacturers defects
