

» Mini G-Lock

Lock

Supplier:
WillowWood™

Features & Benefits:

- Upper extremity and pediatric applications
- Standard pin locking mechanism with pin seal
- Locking pin secures in place at nearest groove, alleviating patient worry of being "caught between clicks"
- Can be used in both exoskeletal and endoskeletal prostheses
- CAD-friendly — able to be used in both aided design and traditional fabrication

Specifications:

- Weight limit: 60kg (132lbs)
- Weight: 67g
- Includes ¼"–20 x38 mm pin and fabrication dummy

Indications:

- Laminated upper extremity prostheses
- Laminated pediatric prostheses

Contraindications:

- Thermoplastic applications

Call Points:

- Prosthetist
- Prosthetic technician

Warranty:

- One year, against manufacturers defects
